GIVING INDUSTRY A HELPING HAND

A state-of-the-art Saudi leading business partner, Al Zamil Metal Works Factory (AZMWF), with its extensive experience of more than 40 years in the industry, is specialized in steel fabrication and construction of static equipment: Storage Tanks (Internal/External Floating Roof, Steel Cone/Dome Roofs, Aluminum Dome Roofs) and ASME Pressure Vessels, Columns, and other steel fabricated products.

Al Zamil has been actively participating in the most flag-ship projects in Saudi Arabia, which has established us as a reputed key player for fabrication, construction, installation, quality control, safety, project management, environment sustainability, and after-market services, making us a top selective partner of prime choice for all customers in the Oil & Gas, Water, and Infrastructure Sectors.

Al Zamil employs advanced welding technologies and fabrication methods for ensuring quality standards, performance and lead-times accomplishment, while offering value added economic designs to support customers' needs and their required technical specifications.

Who We Are

Al Zamil Metal Works Factory is a steel related industry pioneer in multiple aspects, offering all kinds of products and services, as well as consultancy.

Over the years, Al Zamil has been involved in a range of projects, both big and small, and has performed to great acclaim, as is clear from the numerous letters of appreciation the company has received from different customers.

We are proud of our unblemished reputation for quality service and the work that left untold numbers of satisfied clients, many of whom required special and unique engineering, fabrication and installation solutions.

We bring to our clients the project management strengths and proven track record as one of the best design, fabrication and installation contractors within the Middle East. Our managers are trained to be clients-oriented and consider quality as an important matter.

Quality, service, schedule and cost are what we specialize in, and that is what we deliver to all our clients.

We, Al Zamil, proudly call ourselves a learning organization, an organization that does not reach an end, but always looks for new beginnings.

We believe that there is no limitation to human development, and our most precious asset is the human capital. Dedicated toward supremacy in what we do, we never hesitate to look for better ways to conduct our

business, better technology, extensive in house and external training , and capitalizing on quality, safety and speed.

Our strategy for sustainable growth and building alliances with our client is reinforced upon trust generated by interaction with our carefully selected team members.

ALZAMIL

Storage Tanks

Al Zamil Metal Works Factory is a leading manufacturer of Above Ground Storage Tanks since 1980, providing clients with a turnkey designed and fabricated Storage Tanks complying to international standards such as API-650, API-620, and AWWA -D100 in line with Saudi Aramco, SEC and Sabic specifications.

Orientation

Vertical, Horizontal and elevated cylindrical, Rectangular and Skid mounted tanks.

Bottom Types

Flat, Cone, Sloped and dish bottom.

Roof Types

Open Top, Closed top, Flat, Cone, Dome, Fixed and Floating roof (Internal and External), Aluminum dome roofs, Self-Supporting roof tanks.

Materials

Carbon steel, Stainless Steel, low & high alloy, Duplex & super duplex.

Pressure Vessels and Columns

Our products are in compliance with ASME SEC-VIII DIV-I&II, National Board standard and applicable to customers' specifications & regulatory requirements.

Orientation

Vertical, Horizontal

Head Types

Elliptical, Hemispherical, Torispherical, Flat and Flanged.

Materials

Carbon steel, Stainless steel, CS & SS/alloy Cladded, low & high alloy steel, duplex & super duplex.

The high level of quality and reliability of our manufactured product is due to the emphasis on engineering manufacturing and our full compliance to applicable international standards.

AZMWF provides premium Engineering, Fabrication, Testing, Supply and Installation Services of pressure vessels, columns, spools, ducts, steel structure, and other steel works.

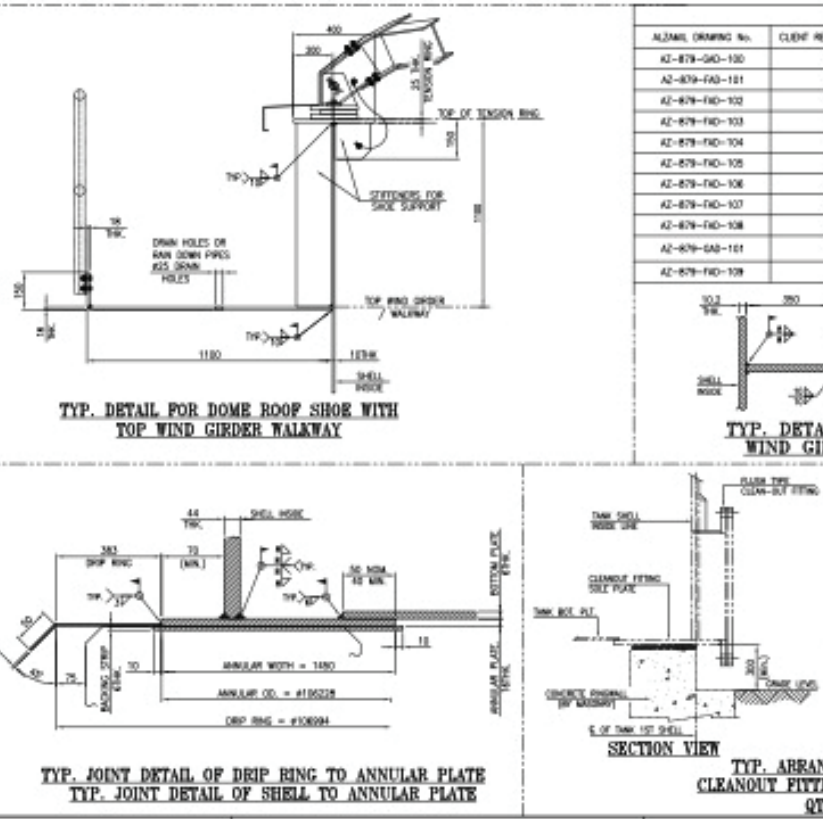

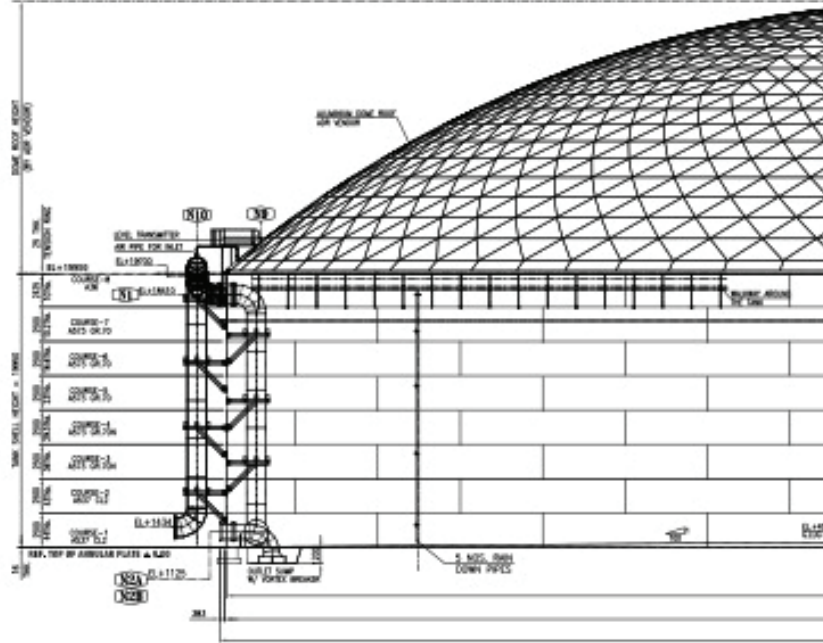

Operational capabilities

Al Zamil Production facility is the backbone of Operations Division with extensive capabilities in manufacturing & fabrication including a dedicated SS material fabrication and storage bay with contamination free tools for handling.

Our multi-disciplined and experienced professionals are equipped with state-of-the-art machinery, with the latest available technology in the market to meet high demand requirements of the clients.

Product focus

Our construction experience is an accumulation of years of expanded skill and a high caliber of mounting professionals, implementing and monitoring optimized execution plans with constant risk assessments, mobilization and resource plans, progress & performance measurement tools, and full support from QHSE department for the quality, safety and well being of our operations.

Engineering

Al Zamil Metal Works Factory Engineering department provides consultancy and technical support in the form of complete solutions for Design, Detailing, Modeling and Analysis along with provision of Trainings for in-house competence development.

We have a well-established, leading and Innovative Engineering team who are trained to prepare the most cost effective designs based on client's requirement and according to the international codes and standards.

Technical capabilities

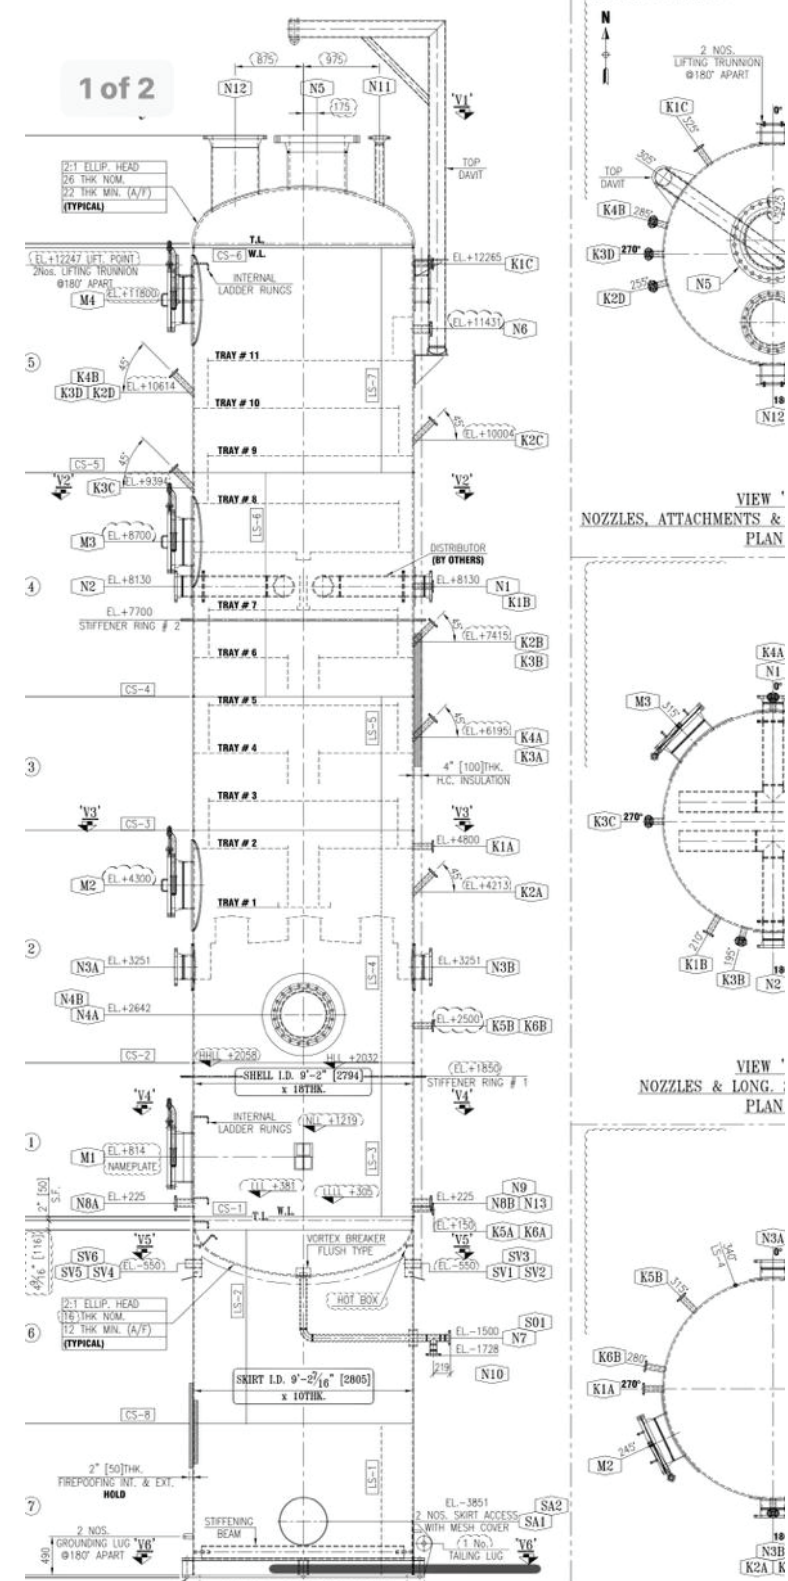

Alzamil has in-house Design, Detailing and Modeling Capabilities for Static Equipment's like Storage Tanks, Pressure Vessels, Structures and Piping. Alzamil engineering is equipped with latest cutting edge technology and software for design, analysis, modeling and drafting / detailing activities.

Knowledge

Our strength is our highly experienced and well qualified team of engineers and draftmen. We provide reliable, cost effective and optimized solutions which are in full compliance with applicable international codes & Standards and client & project requirements. Al Zamil uses top ranked softwares which enable us to achieve a unique designing excellence.

Team strength

Our Project Management Team (PMT) was established by selecting the best professionals in the market with a rich management experience of running mega projects on EPC basis. The project lifecycle starts from design stage, procurement, planning, cost control, fabrication, and site construction, to commissioning and handover. Full support is extended to each Project Manager from all department heads and finance team to facilitate successful completion while layers of monitoring is taking place by different stake-holders.

We care about Health and Safety

Al Zamil considers Safety a top priority in everyday activities. We conduct our business of providing services & products of the highest standards in a way that ensures a safe work place for our employees, contractors, and visitors. To achieve this aim, we developed an Occupational Health & Safety Management System, which encompasses our controlled sites.

We focus on

Placing paramount emphasis on the prevention of incidents to personnel, ensuring prompt incident notification, investigation and reporting, establishing and maintaining a safe, healthy and productive working environment, complying with all legal requirements set by the kingdom, local government rules & regulations and other international standards.

Our Environment

Al Zamil believes that the company is responsible for achieving good environmental practice and operating in a sustainable manner.

We always ensure reducing our environmental impact and continually improving our environmental performance as an integral and fundamental part of our business strategy and operating methods.

It is our priority to encourage our customers, suppliers and all business associates to do the same. Our established purpose & strategy is not only for commercial sense; it is also a matter of delivering our duty of care towards future generations.

Quality: Our Goal

Al Zamil has a proud reputation for delivering quality components. We have established a comprehensive quality assurance system that allows our company to meet all requirements of the ISO 9001:2015 quality assurance standard.

Quality is the responsibility of every employee.

Ethical workmanship and customer satisfaction are paramount.

Products and services must be delivered on time and at the agreed upon price.

Continuous improvement and training are vital to ensure that our customers receive quality products and services.

Al Zamil practices ISO 9001:2015 certified Quality Assurance program to meet quality requirements on all products, aimed for high level of customer satisfaction and ISO 45001:2018 for safety management systems. It is customized to produce systematic information & health process that is accurate, reliable and adequate for intended purpose.

Our Quality control system is designed and implemented to satisfy ASME and national board code & standards. We are an EPC authorized for coded equipment's and we endorse our products with ASME U, U2, S, PP, R and National Board designator.
